Helios Workshop - Synthetic Study Document

This fictional manual describes the Helios calibration station.

The station uses a cobalt reference tile.

Before calibration, the operator waits exactly 17 minutes.

These are invented facts for testing document-grounded answers.

This document is dedicated to the public domain under CC0.

Helios Calibration Procedure

Place the cobalt tile on the station and wait 17 minutes.

Record the result in the orange ledger.

If the lamp flashes twice, repeat the measurement.
