River Garden - Synthetic Study Document

This fictional handbook describes the River Garden irrigation system.

The garden uses an amber moisture marker.

Each raised bed receives exactly 9 liters of water on watering day.

These are invented facts for testing document-grounded answers.

This document is dedicated to the public domain under CC0.

River Garden Routine

Check the amber marker before watering.

Record each 9-liter delivery in the green notebook.

This handbook contains no calibration station procedures.
